

Here is the complete, rebalanced **100-Point Master Health Score Framework** with every section allocated **exactly 20 points**.

To calculate the final **1.0 to 10.0 Health Score**, sum the total earned points across all five sections and divide by 10:

$$\text{Final Health Score} = \frac{\text{Total Earned Points}}{10}$$

Master 100-Point ComplianceIQ Health Score Matrix

None

Section 1: AML Spike & Root-Cause Governance (20 Points)

Focus: Monthly volume variance tracking, mandatory diagnosis (Rule Change, Growth, Macro, Data Error), and MLRO sign-off before operational adjustments.

Measurable Metric	Platform Scoring Rules	Points
Monthly Alert Volume Variance	• Variance $\leq 15\%$ (Normal baseline)	8 pts
	• Variance $16\text{--}35\%$ (Moderate spike)	4 pts
	• Variance $> 35\%$ (Severe anomaly)	0 pts

Mandatory Root Cause Attribution	• 100% of flagged spikes diagnosed with approved catalyst • <100% or unassigned spikes	8 pts 0 pts
Pre-Workflow MLRO Sign-Off	• Sign-off completed prior to tuning rules or workflows • Rule updated without documented RCA sign-off	4 pts 0 pts

Section 2: Financial Filings & Line-Item Variance (20 Points)

Focus: MoM/QoQ line-item swings, attached compliance justifications, and on-time regulatory submission deadlines.

Measurable Metric	Platform Scoring Rules	Points
Line-Item Spike Rate	• 0 unmodeled line-item spikes (MoM/QoQ)	10 pts
	• 1–2 line-item spikes	5 pts
	• > 2 line-item spikes	0 pts

Line-Item Variance Explanation Rate	• 100% of flagged spikes documented & explained • 75% explained • <75% explained	5 pts 2 pts 0 pts
On-Time Filing Submissions	• 0% late regulatory filings in trailing 12 months	5 pts

	• ≥ 1 late regulatory filing	0 pts
--	--	-------

Section 3: Compliance Testing & Review Execution (20 Points)

Focus: Timely completion of scheduled compliance tests and rapid execution of required finding remediations.

Measurable Metric	Platform Scoring Rules	Points
Test Completion Ratio	• $\geq 95\%$ of scheduled tests completed on time	12 pts
	• $\leq 94\%$	8 pts

	• 84%	4 pts
	• <70%	0 pts
Remediation Action On-Time Rate	• 100% test findings remediated within SLA	8 pts
	• 80% test findings remediated within SLA	4 pts

	• $<80\%$	0 pts
--	---	-------

Section 4: Policy, WSP & Task Lag Governance (20 Points)

Focus: Document freshness (expired WSPs), task adjudication velocity (gap between generation and resolution), and aging backlog reduction.

Measurable Metric	Platform Scoring Rules	Points
Task Adjudication Velocity	• Avg delay from generation to resolution $\leq 3 \text{ days}$	8 pts
	• Avg delay $4\text{--}7 \text{ days}$	4 pts

	• Avg delay $> 7 \text{ days}$	0 pts
Aging Backlog Lag Rate	• $0\% \text{ open tasks past SLA}$	6 pts
	• $1\text{--}10\% \text{ open tasks past SLA}$	3 pts
	• $> 10\% \text{ open tasks past SLA}$	0 pts

WSP / Policy Freshness	• 0\text{ expired or overdue policies/WSPs} • 1\text{ policy overdue } \le 30\text{ days} • \ge 1\text{ policy overdue } > 30\text{ days}	6 pts 3 pts 0 pts

Section 5: Complaint Analytics & Isolation (20 Points)

Focus: Normalized complaint density per 1,000 accounts, mandatory root-cause isolation (Process, Channel, Sales, Macro), and escalation SLA tracking.

Measurable Metric	Platform Scoring Rules	Points
Mandatory Spike Isolation & RCA	• $\geq 100\%$ of quarterly surges assigned an analytics driver	8 pts
	• $< 100\%$ or unassigned surges	0 pts

Normalized Complaint Density	• < 0.5 \text{ complaints per 1,000 active accounts}	6 pts
	• 0.5 \text{--} 1.5 \text{ per 1,000}	3 pts
	• > 1.5 \text{ per 1,000}	0 pts

Overdue Regulatory Escalations	• 0 complaints breaching regulatory response SLAs	6 pts
	• 1 overdue	3 pts
	• > 2 overdue	0 pts

Final Scoring Tier Classifications

Total Points	Final Score Range	Governance Tier	Operational Meaning
90 – 100	9.0 – 10.0	Exemplary (Low Risk)	Complete control, rapid task adjudication ($<3\text{ days}$), 100% root-cause coverage.
70 – 89	7.0 – 8.9	Healthy (Moderate Risk)	Minor task delays ($\leq 7\text{ days}$), zero overdue filings, solid governance.
50 – 69	5.0 – 6.9	Elevated Risk	Frequent task lag, unassigned complaint/AML spikes, or overdue policy reviews.
30 – 49	3.0 – 4.9	High Risk	Severe backlogs, line-item financial swings left unexplained, missed test deadlines.

0 – 29	1.0 – 2.9	Critical Failure	Widespread operational breakdown, regulatory SLA breaches, absent CCO sign-offs.
---------------	------------------	-------------------------	--

Here is the regenerated dashboard mockup, redesigned with a high-contrast **Executive Summary Panel** that prominently highlights the **1–10 Health Score**, **Risk Tier**, and **Total Earned Points (out of 100)** as the focal points of the UI.

Summary of the Visual Hierarchy

None

Key UI Features

1. **The Big Three Key Metrics:**
2.
 - **Main Score (8.5 / 10):** Prominent hero number for immediate clarity during executive board or CCO reviews.
 - **Risk Tier (HEALTHY / Moderate Risk):** Color-coded badge (Cyan/Blue) for instant risk categorisation.
 - **Total Points (85 / 100):** Explicitly shows the underlying raw point sum across all 5 equal 20-point categories.
3. **Category Deep Dives:** Clicking any category row expands to show the exact point breakdown, system metrics, and underlying logic.

- 4.
5. **Interactive RCA Workflow Modal:** Click "**Diagnose AML Alert Spike**" in the upper right to test the forced workflow that blocks threshold adjustments until the compliance officer logs a root-cause catalyst.
